EXPERIENCE

- **Accenture - UX Engineer**
September 2025 - Present
 - -Designed a next-gen Generative AI-driven agent operations platform that **automated repetitive tasks**, reducing processing time and significantly increasing enterprise productivity. Built seamless multi-user experiences that supported concurrent workflows, enabling effortless collaboration and **role-based usage across complex systems**.
 - Created **scalable design systems** with structured components and auto-layout principles, ensuring design consistency, development efficiency, and smoother cross-team collaboration.
- **Defy Aerospace - Product Designer**
November 2024 - March 2025
 - Redesigned current website using storytelling to convey the company vision **generating 100+ quality leads**
 - Research within farming community helped create feature flows and testing for company product.
- **Unisys Corporation - UX Engineer**
May 2024 - October 2024
 - Worked on building **Design system**.
 - Redesigned product dashboard components with **iterative, user-centric** approaches, **enhancing scalability**.
- **Mould Artspace - Experience Designer**
October 2023 - February 2024 |
 - Mapped spatial layouts and strategically positioned **interaction points** to **enhance** user experience in curated spaces.
 - Led the **creation of the logo** and **comprehensive branding strategy**, ensuring alignment with the vision of the space and resonance with the **target audience**.
